Studies in Natural Science and Design

Rosenvilde Videregående skole

2014-2017 Bærum, Norway

INTERESTS

Sports and Outdoors

I have always loved sports and the outdoors. One of the best experiences I have ever had was hiking over Hardangervidda with my family as a kid. As well as hiking and skiing in the mountains, I enjoy football, spinning and working out in gyms.

Art

For as long as I can remember I have been very interested in art. I started at a design and art oriented program in high school. After one year I discovered that making art was not for me, so I took a Natural Scientific turn instead, but the love and interest for art remained.

Travel

Growing up I grew fond of meeting people around the world and learning about other cultures and customs. As I started earning my own money, much of my savings were spent on traveling, especially in Asia.
